

Grupo I

- 1) V
- 2) F
- 3) V
- 4) F
- 5) F
- 6) F

Grupo II

- 1) $A = \{1, 2, 3\}$
 $B = \{4, 5, 6\}$

2) $W = \{(1, \{1, 2\}), (1, \{1, 3, 4\}), (2, \{1, 2\}), (3, \{1, 3, 4\}),$
 $(4, \{1, 3, 4\}), (5, \{5\})\}$

$$W^{-1} \circ W = \{(1, 1), (1, 2), (1, 3), (1, 4), (2, 1), (2, 2),$$
$$(3, 1), (3, 3), (3, 4), (4, 1), (4, 3), (4, 4),$$
$$(5, 5)\}$$

$$3) R = \{ (1,1), (2,2), (3,3), (4,4), (5,5), (6,6), \\ (3,1), (1,3), (1,2), (2,1), (4,6), (6,4), (5,6), \\ (6,5), (1,2), (3,2), (2,3) \}$$

$$4) \{ (2,2), (3,6), (9,13) \}$$

$$5) \text{Max}(x) = 13, 12, 11 \\ \text{Sup}(x) = 12$$

Grupo III

$$1) a - \text{Sejam } a, b \text{ e } c \in \mathbb{R} \\ \text{Se } a - b \in \mathbb{Z} \\ \wedge \\ b - c \in \mathbb{Z} \\ \Rightarrow a - c \in \mathbb{Z}$$

Se $a - b \in \mathbb{Z}$, a e b têm de pertencer a $\mathbb{Z}$

Se $b - c \in \mathbb{Z}$, b e c têm de pertencer a $\mathbb{Z}$

Se a e c pertencem a $\mathbb{Z}$, a maioria sempre pertence a $\mathbb{Z}$

Logo
e' transitiva

b- $\mathbb{Z}$

c- $a = \frac{5}{2}$

$$\frac{5}{2} - \frac{1}{2} = \frac{4}{2} = 2 \in \mathbb{Z} \quad \text{Logo } \frac{5}{2} p \frac{1}{2}$$

$$\frac{3}{2} - \frac{1}{2} = \frac{2}{2} = 1 \in \mathbb{Z} \quad \text{Logo } \frac{3}{2} p \frac{1}{2}$$

2) a-

b- $\mathcal{N}(\mathcal{C})$ e' um reticulado pois $\exists$ existe sub $\{-1, 1\}$

$$3) a - \begin{aligned} f(-3) &= 8 \\ f(0) &= 2 \\ f(1) &= 1 \\ f(2) &= 3 \end{aligned}$$

$$f \leftarrow \{ \exists k \in \mathbb{N} \text{ e } \text{par} \} \\ = \mathbb{Z}_0^-$$

$$b - g \circ f = \begin{cases} -2 + 2m & \text{se } m < 1 \\ -2m + 1 & \text{se } m \geq 1 \end{cases}$$

c - Falso pois para qualquer valor maior que 0, o resultado será negativo que $\notin \mathbb{N}$
